

Hospital Evacuation Plan

Hulhumale Hospital

Document version	2.0
Record type	Demonstration operational document
Status	Controlled copy

Evacuation priority

Move patients in immediate danger first, followed by ambulatory, non-ambulatory, and critical-care patients.

Assembly areas

Clinical teams report patient counts and destinations to the evacuation coordinator at the designated assembly point.

Transport

Confirm ambulance and medical-launch availability before transferring patients to another facility.

Accountability

Department leads submit final staff and patient accountability reports to the incident command post.

Demo record - replace with the approved facility document before production use.
